## The Haglog Soiltax Soil Sampler

**The Soil Sampler is a classic must-have instrument in every geologists' and many foresters' equipment store. Haglöf Sweden has produced a classic "walking stick" soil sampler for many years.**

The Soil Sampler is milled from one large piece of high quality steel and is produced in two lengths for sampling on 700mm or 900 depths.

This sampler will be appreciated by both professional foresters, researchers and schools, for its extremely durable construction, made to last for years of field work.

The Soil Sampler has a groove in the side. Simple to operate - Push the Sampler into the ground, rotate half a revolution and pull out again. The Soil Sampler has 100mm graduations.

Classic Walking Stick Head

SKU: 16-102-1005 900mm Stick

SKU: 16-102-1006 700mm Stick
